Beyond this I cannot proceed as it will affect your attempt to make online payment indicating a pending status or the like. I have hence aborted from above screen as below:

After you finish with your details in your bank site and OTP entry etc.. depending upon how the bank has configured for your transaction you will be provided an online e-receipt which you can print or even download a soft copy depending upon your requirements. I have attached a sample screen shot for your view which is always displayed at the end of the complete payment process and when indicated as successful. Initially after successful payment process you will see the below screen which will be active for 10 seconds for your view and not for you to do anything.

But after 10 seconds the screen below is displayed for you to print your receipt at ease in pdf format of course or even save as soft copy in pdf format as you desire.

The downloaded soft copy of the receipt will look like the one below:
